

## EXPERIENCE

### Front-end Developer | Jun '23 – Present Empowered Futures | Calgary, AB (Remote, Volunteer)

- Develop and maintain mentor/mentee platform as a part of Front-end team, utilizing Next.js, React with TypeScript
- Optimized, scaled, enhanced and secured full stack web application, following SDLC and agile methodology

### Software Developer | Dec '22 – Oct '23

Unimak Woodworking Machinery | Mississauga, ON

- Developed internal inventory and supply chain management software, utilizing MongoDB, Express.js, React, Node.js to optimize operations.
- Implemented secure RESTful API endpoints with authentication and authorization to control data access for authorized personnel.

### Peer-Tutor | Jan '23 – May '23

Seneca Polytechnic | Toronto, ON (Part-time)

- Conducted 14 one-on-one tutoring and debugging sessions weekly, covering web, object-oriented programming, and database systems.

### SLG Leader | Aug '22 - Dec '22

Seneca Polytechnic | Toronto, ON (Coop)

- Organized and led 14 study sessions each week for 60 students in Programming with C and Unix/Linux Systems.

### Search Engine & Social Media Evaluator

Appen | Chatswood, AU (Remote) Mar 20 – Dec 21

- Conducted keyword evaluations for search engines and social media platforms to enhance search results.

## PORTFOLIO PROJECTS

### Curiee | Treatment Management Software

- Full-stack web application using React, Express.js, Node.js, Mongoddb, TailwindCSS, featuring a REST API
- Designed web app for therapists to assign personalized treatments and patients to explore new treatment modals.
- Optimized treatment tracking, ratings, and favorites for enhanced healthcare experiences.

### AuctionHub | Web Ecommerce Application

- Developed a full-stack web application using Python and Django, with HTML/CSS for front-end.
- Created an auction platform with features such as listing management (add, remove, and update), user search, bidding, commenting, and watchlist functionality.

## TARIK OZTURK

Software Developer
